Quick Answers to Clinical Questions at the Point-of-Care
Provide quality, evidence-based care
Reduce medical errors
Save time
Engage and educate patients
Search using your own words
Quickly check for drug interactions
Further your medical education

Wolters Kluwer Health is the Professional’s First Choice

As part of Wolters Kluwer Health, Ovid provides professionals and students in medicine, nursing, allied health, pharmacy, and the pharmaceutical industry with sophisticated tools and comprehensive information to help them improve healthcare and save lives.
Improving patient care, treatment, and education

- "What is the correct treatment for Hashimoto’s Disease?"
- "What are the indications for surgical repair of an aortic aneurysm?"
- "Do Warfarin and Hydrochlorothiazide interact?"

Healthcare professionals are under constant pressure to respond to rapid advancements in medical care. In a clinical setting the additional challenge is getting immediate access to actionable information that’s pertinent to a specific patient case. As an integral component of the medical team, clinicians, students, and patients rely on you to find ways to deliver that information so they can get quick answers and make critical clinical decisions immediately.

ClinicalResource@Ovid is a complete end-to-end solution that integrates with your existing Ovid services, combining a vast amount of clinically relevant, evidence-based information resources — from diagnostic and treatment guidelines to drug descriptions to natural product reviews — and delivering it quickly and easily to the physician’s office, the nursing station, the ER, or the ward. Unlike other point-of-care tools, it offers clinicians one-click access to short answers from peer-reviewed resources and leading specialists in their respective fields, as well as in-depth research material through your Books@Ovid subscription.

Components of ClinicalResource@Ovid

**Clin-eguide Evidence-Based Treatment Guidelines**
Evidence-based and synoptic diagnostic and treatment recommendations for frequent and high-cost problems occurring in primary care, inpatient, and emergency department settings. Healthcare professionals can access relevant information fast and make informed decisions immediately. Key performance improvement indicators are added throughout to ensure optimal patient outcomes and adherence to regulatory standards.

**5-Minute Consult Database**
More than 950 physicians and clinicians at your fingertips! This unique collection of the 1,200 five-minute topics contained in three top-selling 5-Minute Consult books in clinical medicine, pediatrics, and emergency medicine is more than simply the sum of its parts. By the end of 2006 there will be more than 2,500 topics! Nursing considerations—unique among point-of-care products—supplement each topic. ICD9-CM codes are also conveniently included to expedite administrative processes.
Ovid MEDLINE® (1996-present)
From the National Library of Medicine, the definitive index to the clinical medical literature, with full text links to subscribed Ovid and non-Ovid journals configured through Links@Ovid or Ovid LinkSolver™.

Drug Facts & Comparisons
A monthly updated comprehensive drug information guide. More than 22,000 brand-name and 6,000 generic prescription and over-the-counter drugs are described and compared in convenient charts and tables.

A to Z Drug Facts
A perfect companion resource to Drug Facts & Comparisons, this monthly updated database features the nuts and bolts: dosages, side effects, and indications, as well as information on drug therapy and patient care and pharmacological and patient care considerations.

Review of Natural Products
As patients seek information on non-traditional remedies, here are referenced reviews of the pharmacology and use of herbals, botanicals, and other natural products. Based on scientific research, these more than 300 in-depth monographs feature details on botany, history, chemistry, pharmacology, medicinal uses, toxicology, drug interactions, and patient information.

National Guideline Clearinghouse™
Evidence-based clinical practice guidelines collected by the Agency for Healthcare Research and Quality, part of the U.S. Department of Health and Human Services. Summary abstracts and full text are included. Search by keyword or browse by disease or treatment.
McKesson Patient Handouts

Studies show that patients ask for more information from their physician one out of every three visits. Personalized for the patient and written for a lay audience, handouts from McKesson Clinical Reference Systems build trust and cement the doctor-patient relationship. They describe more than 4,500 adult, pediatric, senior, and women’s health topics, and address a variety of conditions, procedures, and treatments.

MedFacts

With pharmaceutical advertising ubiquitous in magazines and on television, patients feel more informed than ever about the medications they’re taking. But are they really? Nearly 11,000 MedFacts handouts provide detailed information, including indications, contraindications, precautions, and side effects, on over-the-counter and prescription drugs. Patients come away empowered with knowledge about their own healthcare. In Spanish, too!

Books@Ovid

By following up point-of-care activities with more in-depth research, healthcare professionals uncover comprehensive material underscoring diagnoses and treatments. Through your Books@Ovid subscription, they’ll get instant access to a growing list of more than 350 books, the largest online collection of core clinical texts. Industry-leading linking tools connect them instantly with your subscribed full-text articles and EBM resources.
ClinicalResource@Ovid—Improving patient care, treatment, and education

**Instant single-click access**
With quick natural language queries, healthcare professionals get only those search results they need, arranged in order of relevancy.

**Integrated, continuously updated content**
Content has been selected *by* and *for* healthcare practitioners. Sophisticated linking technology connects all information resources so content is fully integrated.

**Immediate clinical decision support**
With the right information at the right time, healthcare professionals can provide better, safer, faster care while they practice medicine.
