Time	Presentation & speakers	Summary
	Monday 28 October **Session 1 - Chair: Heather Gordon**	
10.00am	Start	
10.00-10.10am	Welcome *Linda O'Brien, Pro Vice Chancellor (INS), Griffith University*	
10.10-10.15am	Housekeeping	
10.15-10.30am	Opening *Heather Gordon, Director, Library and Information Services, at James Cook University and Chair of CRAC*	
10.30-11.00am	Open Repositories 2013 conference *Reports from Australian and New Zealand attendees* *Stephen Cramond, University of Melbourne* *Maude Frances, University of New South Wales* *Andrea Schweer, University of Waikato*	The aim of the Open Repositories Conference is to bring those responsible for the development, implementation and management of digital repositories together with stakeholders, such as researchers, librarians, publishers and others, to address theoretical, practical, and strategic issues across the entire lifecycle of information, from the creation and management of digital content, to enabling use, re-use, and interconnection of information, and ensuring long-term preservation and archiving. OR2013 was held in Canada with a theme of "Use, Reuse, Reproduce". One of the most important roles of repositories is to enable greater use and reuse of their contents— whether those contents are library collections, scholarly articles, research data, or software—and metadata.

Time	Presentation & speakers	Summary
	Peter Sefton, University of Western Sydney	
11.00-11.15am	NZ Repository Community Day *Reports from New Zealand attendees* *Kate Miller and Andrea Schweer, University of Waikato*	LCoNZ held an unconference/barcamp for people involved in DSpace Institutional Research Repositories in New Zealand in Wellington on 29 August 2013. The objective of the day was to provide the opportunity for people involved with NZ DSpace institutional repositories at the operational level to exchange experiences, best practices etc. and to be inspired by initiatives at other institutions.
11.15am-12.00pm	CAUL Repository Statistics and Repository Managers Survey *Libby Cass, CAUL*	The most recent CAUL Repository Statistics and results of the 2013 Repository Managers Survey.
12.00-1.00pm Lunch		
Monday 28 October **Session 2 - Chair: David Groenewegen**		
1.00-1.30pm	Symplectic demonstration *Lisa Ogle, University of Newcastle*	This presentation will provide an overview of the experience of the University of Newcastle in implementing the Symplectic Elements system. It will outline our goals in implementing the system and give insight into what we achieved, and what we were unable to achieve, within the project timeframe. Our principal goal was streamlining the HERD collection and improving the speed at which our researchers' online profiles were updated.
1.30-2.00pm	Clever Crosswalking – what do you take from one system to another? *Yanan Zhao, University of Auckland*	This presentation will look at a metadata crosswalk implemented between a DSpace repository and a Research Management System (Symplectic Elements) at the University of Auckland (UoA).
2.00-2.30pm	Altmetrics	Scholarly communication channels are undergoing a transformation. In addition

Time	Presentation & speakers	Summary
	Mark Fallu *Griffith University*	to traditional channels centred on formal publications, scholars are making increasing use of a range of social media to discuss, share and promote their ideas and outputs. Altmetrics incorporates statistics other than traditional bibliometrics, which are largely based on citation analysis, and has an expanding scope including mentions of scholarly outputs in social media, reference-sharing tools, blogs and so on. This presentation will cover the practicalities of how altmetrics can be included in a repository or related discovery service.
2.30-3.00pm	Managing grant publication mandates @UOW: an interoperable, implementation model *Michael Organ, University of Wollongong*	The introduction of grant publication mandates by the NHMRC and ARC during 2012 provided Australian universities not only with the opportunity to increase the amount of full text content in their open access repositories, but also offered, for the first time, the possibility of assessing the impacts of research grants through bibliometric analysis of published outputs. Since the mandates were announced, the University of Wollongong Library has actively worked with the Research Office and academics to implement a workable, sustainable process which captures information linking research outputs with specific grants and, using that information, begin the work of enabling local IT systems to capture and analyse data in this space. The aim is to develop a dashboard in which primary grant data such as who, what and how much, is linked to publication outputs and impacts and accessible in a timely fashion.
3.00-3.30pm	Afternoon tea	
Monday 28 October **Session 3 - Chair: Paula Callan**		
3.30-4.00pm	The 3D Anthropological and Archaeological Collection Repository at UQ *Prof. Jane Hunter & Damien Ayers, University of Queensland*	UQ eResearch Group and the Anthropology Museum at the University of Queensland have successfully completed the ANDS-funded project: '3D Anthropological and Archaeological Collection Repository'. This is a link to the Repository UQ Anthropology Museum's online catalogue containing around 30,000 items: http://catalogue.anthropologymuseum.uq.edu.au

Time	Presentation & speakers	Summary
4.00pm-4.30pm	Research output discoverability in Australia and New Zealand Timothy McCallum, University of Southern Queensland	Australian and New Zealand universities have fallen in the latest world university rankings. Rankings are here to stay, influencing consumer choice as well as industry and government funding. Our individual institutional repositories are also being publicly ranked on the world stage. Various processes and algorithms are used to determine positions in these rankings, including but not limited to Google Scholar inclusion. This presentation will provide information for future directions.
4.30-5.30pm.	Repository Software Platform Meetings	DSpace, EPrints, VITAL, Equella, etc (sign-up sheets on the day)
5.30pm Evening reception Function Space, Level 7 Webb Centre, Southbank		
Time	Presentation & speakers	Summary
Tuesday 29 October Session 1 Chair: Natasha Simons		
8.30am	Start	
8.30-9.30am	Open access: policies, practices, challenges *Danny Kingsley, AOASG* *Paula Callan, QUT*	Interest and activity in the open access space continues to escalate, bringing new challenges and opportunities for those implementing open access. This presentation will cover some of the big events in open access worldwide in 2013, and discuss the innovations in open access book publishing and the social media platforms incorporating open access. Publishers are responding in different ways to the new landscape, increasing the challenge of staying current and compliant. The issue of predatory publishing is also causing challenges for open access advocates. The talk will conclude with a summary of AOASG activities and their impacts to date.
9.30-10.00am	4A Data Management. Acquiring, Acting-on, Archiving and Advertising research data at the University of Western Sydney	There has been significant Government investment in Australia in repository and eResearch infrastructure over the last several years, to provide all universities with an institutional repository for publications, and via the Australian National Data Service to encourage the creation of institution-wide Research Data Catalogues, and research Data Capture applications. Further rounds of funding

Time	Presentation & speakers	Summary
	Peter Sefton *University of Western Sydney*	have added physical data storage and cloud computing services. This presentation looks at an example of how these streams of money have been channelled together at the University of Western Sydney to create a joined-up vision for research data management across the institution and beyond, creating an environment where data may be used by research teams within and outside of the institution. Alongside of the technical services, we report on early work with researchers to create a culture of replicable use of data, towards the vision of truly reproducible research. (This paper was presented at OR2013).
10.00-10.15am	Moving research datasets to the cloud *Elke Dawson, Central Queensland University*	CQU has been working with QCIF to move their larger datasets to QCloud and integrate this with their repository.
10.15-10.30am	ANDS update *Andrew White* *Australian National Data Service*	Update on the activities of the Australian National Data Service.
10.30-11.00am	Morning tea	
Tuesday 29 October **Session 2 Chair: Maude Frances**		
11.00am-12.00pm	Duraspace *Jonathan Markow, DuraSpace Chief Strategy Officer*	For the past ten years, the DuraSpace digital repositories—DSpace and Fedora—have been in wide use throughout Australia and New Zealand. More recently, the newest DuraSpace project, VIVO, aimed at discovery of researchers and their work, has also seen growing adoption in Australasia. In this presentation, Jonathan Markow, DuraSpace Chief Strategy Officer, will bring us up to date on the status of DuraSpace and its open source projects.
12.00-1.00pm	Lunch	
Tuesday 29 October Session 3 Chair: Libby Cass		

Time	Presentation & speakers	Summary
1.00-3.00pm	Repository of the Future Workshop *David Groenewegen, Monash University* *Natasha Simons, Griffith University* *Andrea Schweer, University of Waikato* *Peter Sefton, University of Western Sydney*	This workshop is an opportunity to engage the wider international repository community to discuss the drivers, trends, exemplars and start to shape new futures for repositories. We will divide into groups and discuss various burning questions. We will come together at the end and discuss the results. This workshop is designed to be very interactive with plenty of discussion and feedback time.
3.00-3.15pm	Open Repositories conference	OR2014 will be in Helsinki, Finland, 9-13 June. See http://or2014.helsinki.fi/ UQ are planning to put in a bid to host OR2016 in Brisbane
3.15-3.30pm	Summary and close *Heather Gordon*	
3.30pm	Finish
