

# DATA PACKAGING

Possible to do, but how and what for? CAIRSS 28 October 2019

Ingrid Mason, Deployment Strategist, eResearch @AARNet

Data packaging

Technology development

Packaging in lifecycles

## A DATA PACKAGE IS...

"A data package is simply the combination of a dataset with metadata that describes the dataset.

The purpose of the data package is to provide sufficient contextual data to make the dataset usable to others. It therefore becomes the basis of a loosely coupled data management platform in which the information is in the dataset, not in the platform. A receiving platform just needs to be able to access and interpret the package."

A side serve of metadata: evolving AARNet's tools for data packaging

Gavin Kennedy & Ingrid Mason (AARNet); Peter Sefton (UTS).

CS3 2019 - Cloud Storage Synchronization and Sharing Services, 28-30 January 2019

## WHAT DOES A DATA PACKAGE ENABLE?

Facilitates depositing of research data to repositories.

Facilitates data sharing (FAIR principles).

Facilitates the repeatability or reproducibility of research.

- Data packages typically contain
  - Digital material (files like data, software etc)
  - Metadata (information like description, ownership etc)
  - Renditions metadata outputs in a preferred format
  - Formats including:
    - HTML, XML, JSON-LD
    - DC, MARC, Schema.org

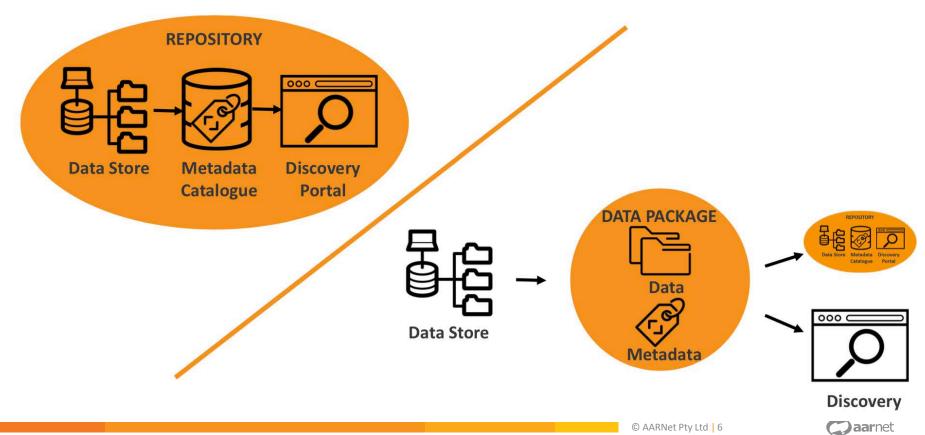

#### TECH DEVELOPMENT

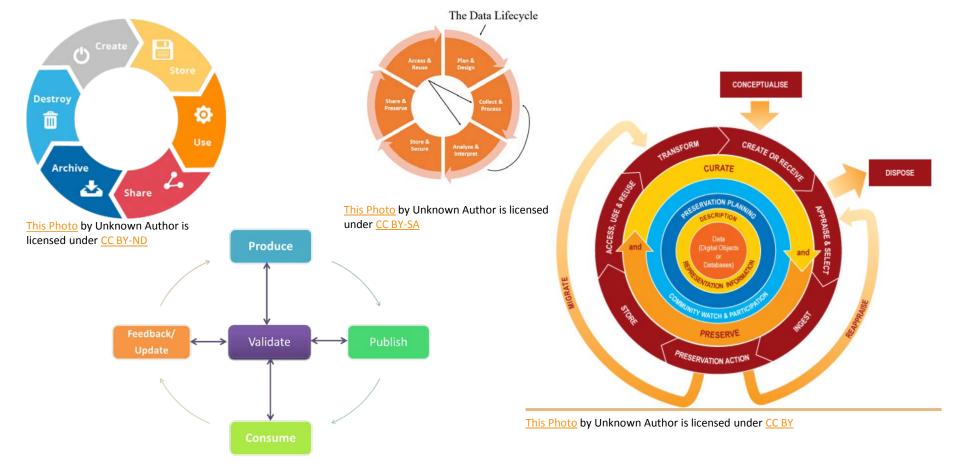

Data packaging technologies and their evolution (here in Australia with global connections)

- First there was BagIt (file manifest spec)
- cr8it was developed using BagIt (WSU software) & PanDA was developed using BagIt (SLNSW software)
- cr8it was redeveloped by Intersect, AARNet and WSU (as an ownCloud plugin) to become CloudStor Collections
- DataCrate developed (UTS) (based on cr8it)
- RO-Crate was built based on DataCrate (Research Object and OCFL specs)
- Research Object spec > community effort <a href="http://www.researchobject.org/specifications/">http://www.researchobject.org/specifications/</a>
- Oxford Common File Layout spec > community effort <a href="https://ocfl.io/">https://ocfl.io/</a>
