Gap analysis background

- Context of RUNE (repository) and UNE
- What is a gap analysis?
- Why we did a gap analysis?

Gap(s)

GAPS?

What is “Missing In Action” (M.I.A.)

Gaps UNE Identified

**Missing
Publications**

Funding

**Open
Access**

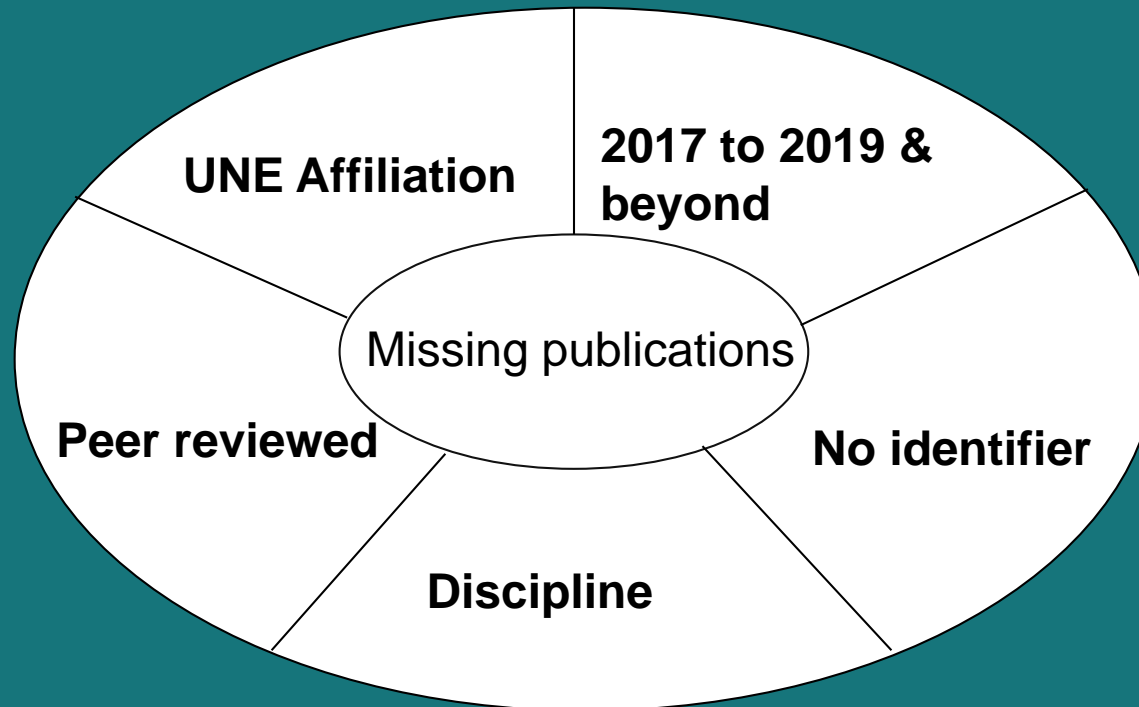

Activity 1

Working in groups or by yourself, identify a *possible gap* in your repository.

Write this gap in the middle of the mind-map.

Factors

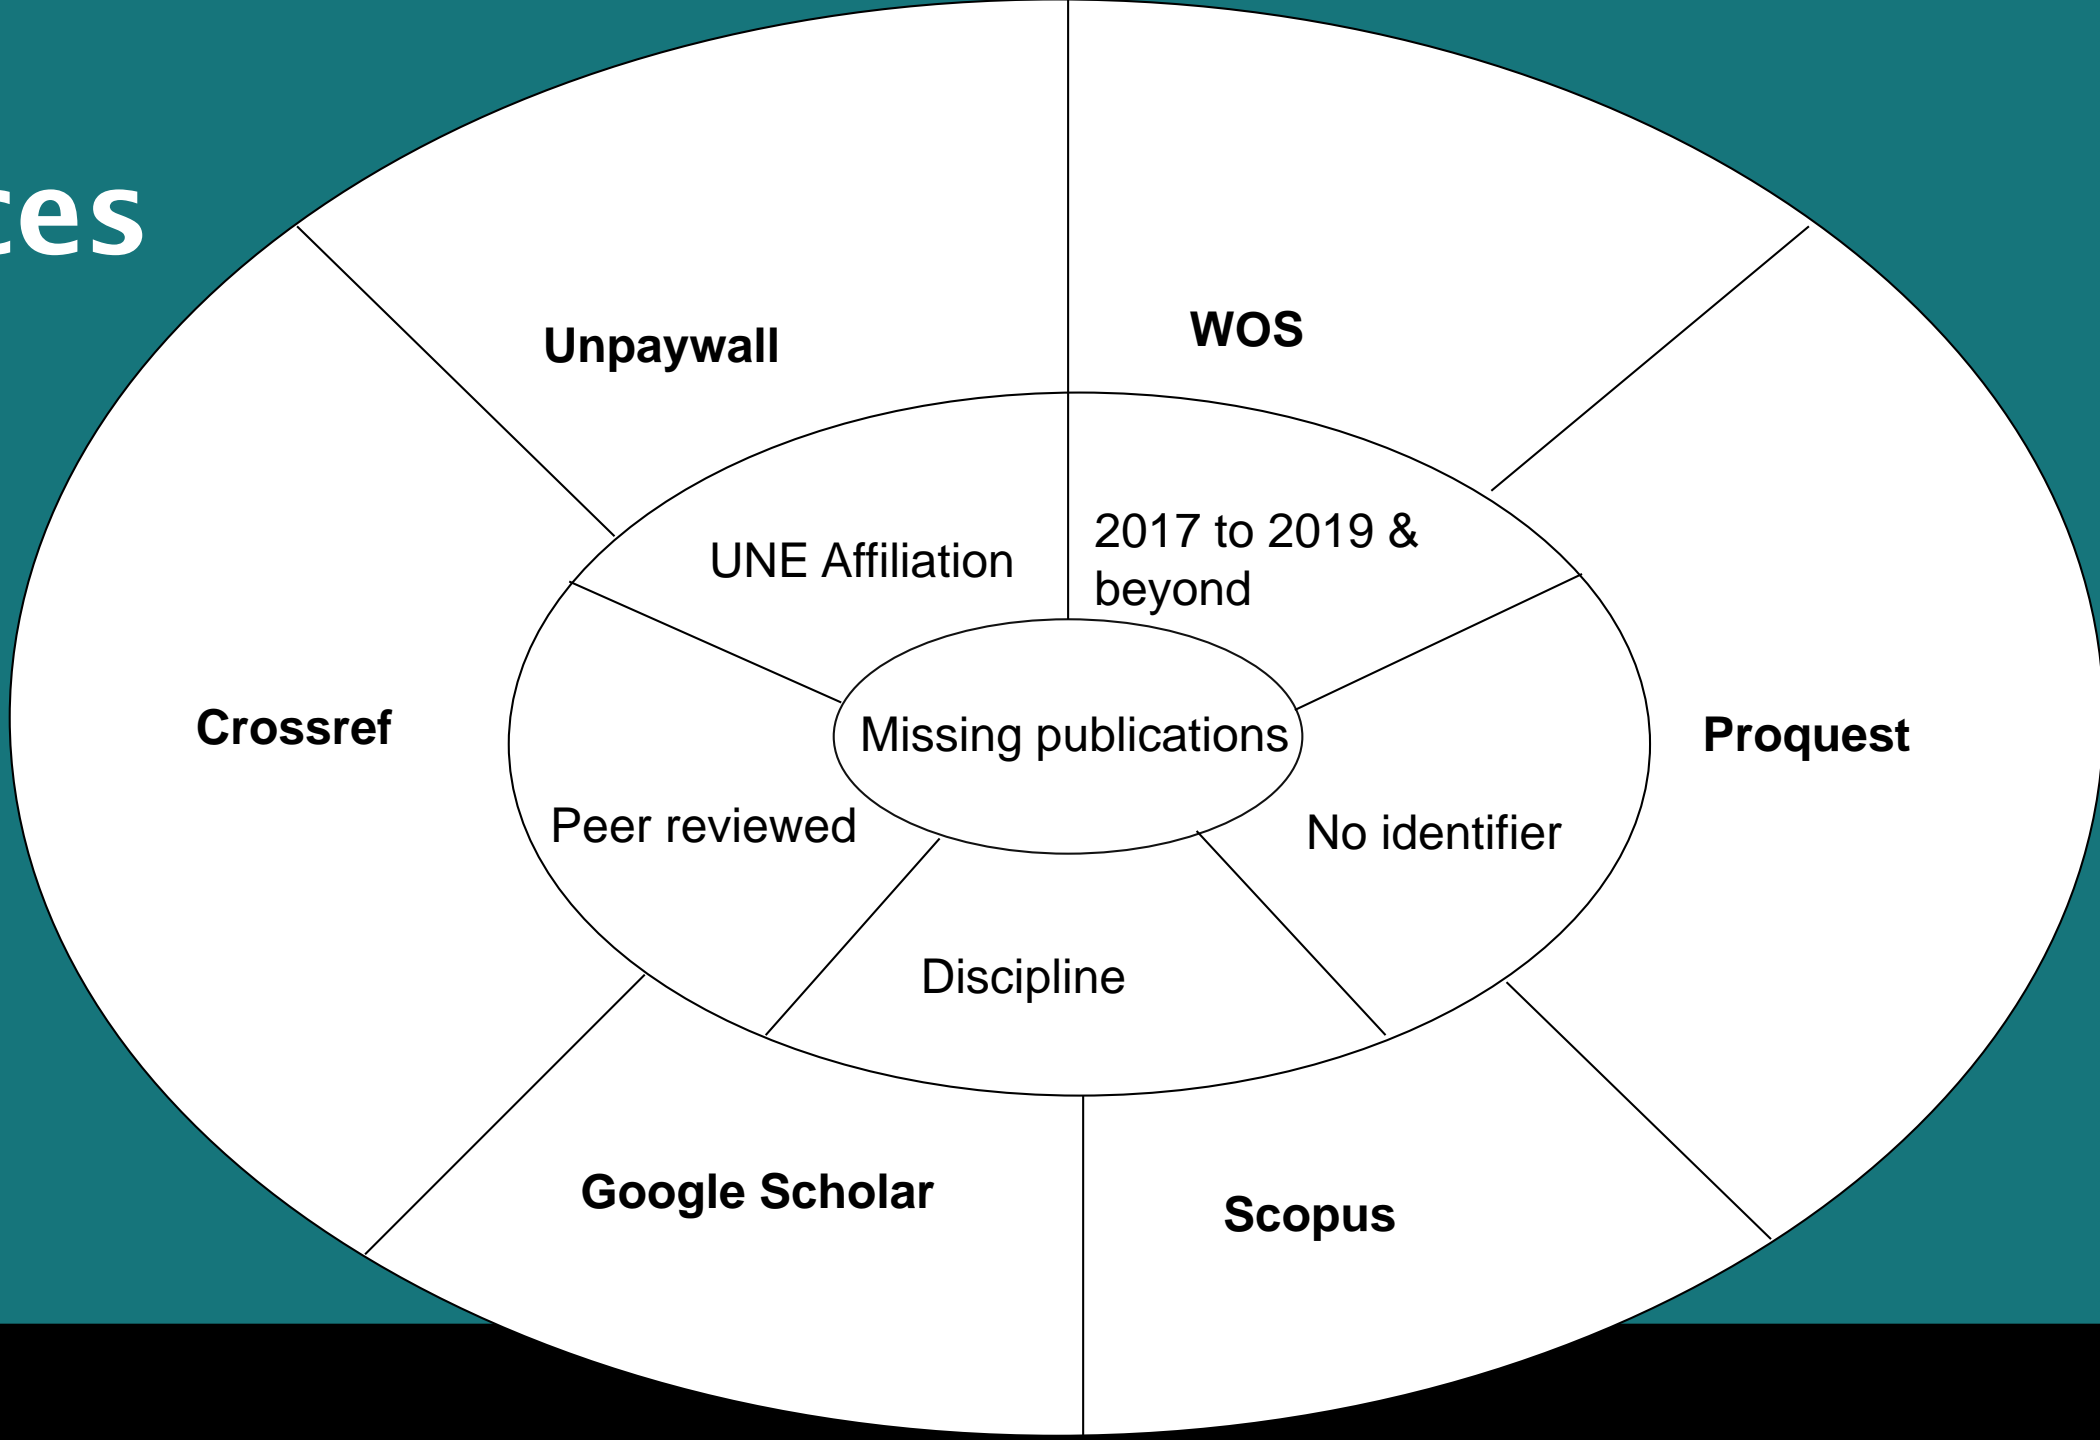

Activity 2

Working in the same groups, brainstorm different *factors* of the identified gap.

Add potential factors around the second ring.

Sources

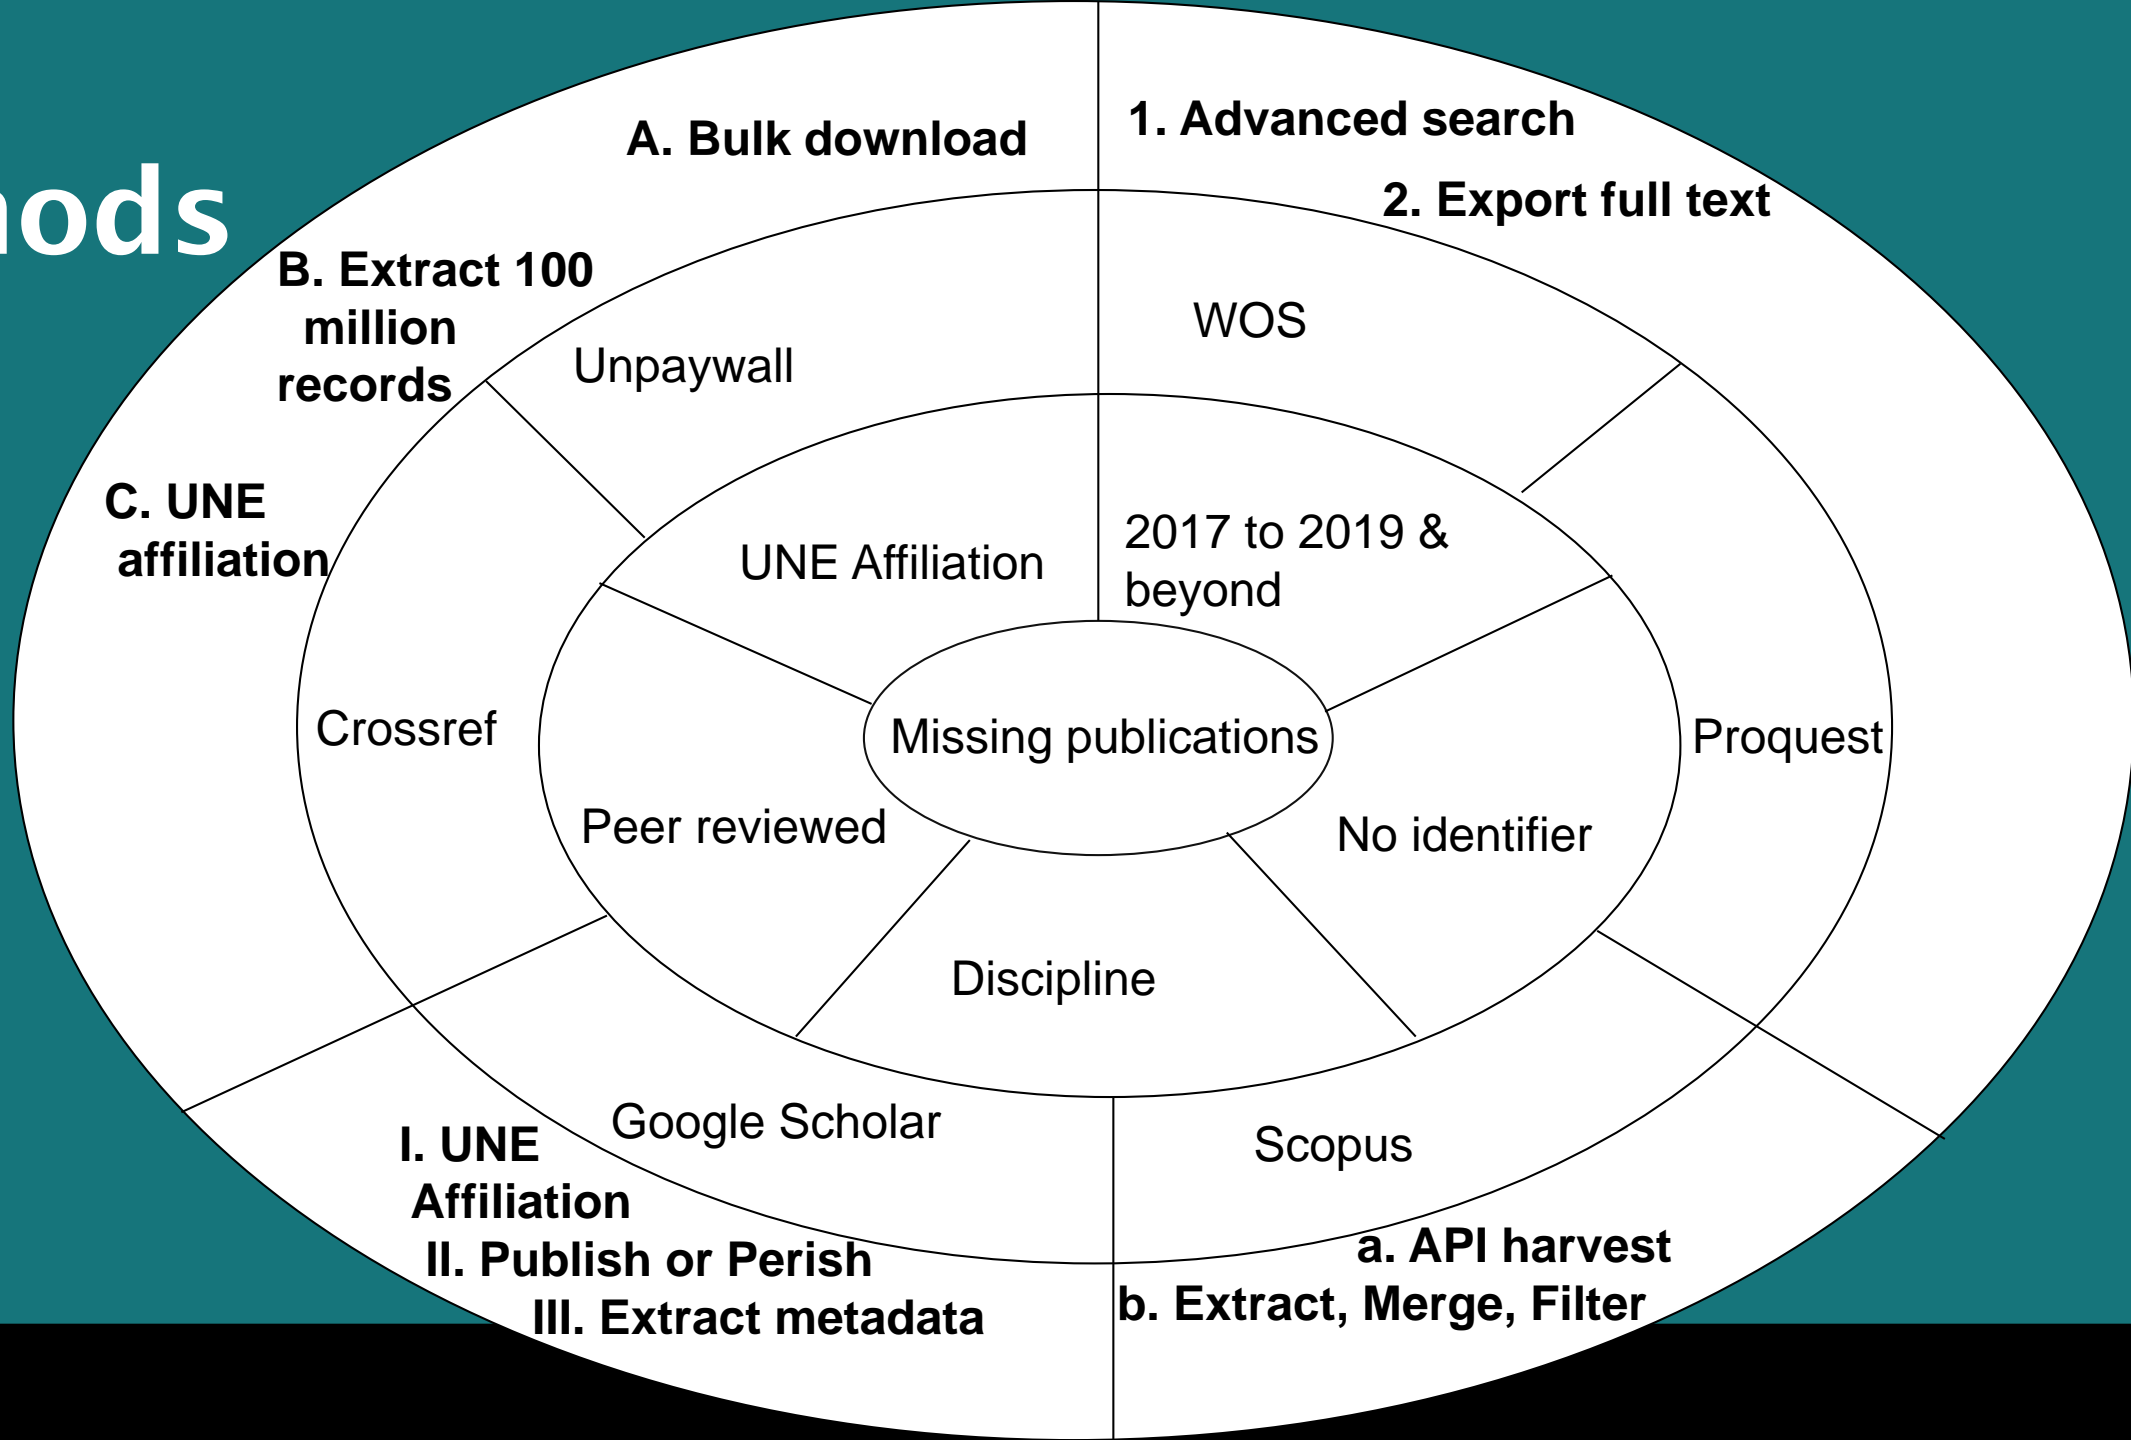

Activity 3

Working in the same groups, brainstorm ideas for different sources to find data/metadata on the identified factors.

Add potential sources around the third ring.

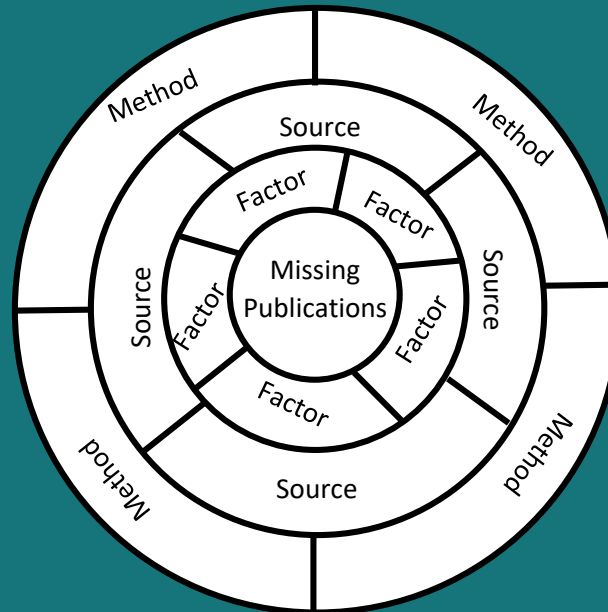

Methods

Activity 4

Brainstorm possible methods to extract data/metadata from the different identified sources.

Add potential methods around the outer ring.

Outcomes: Missing Publications

Year	Scopus	WOS	Proquest	Crossref	Unpaywall	Total
2014	212	55		7		274
2015	204	69	4	4		281
2016	235	89	1	3		328
2017	169	109		8	1	287
2018	256	142	1	10		409
2019	139	110				249

Outcomes: Lessons

- Remaining gaps
- Capturing transient UNE researchers
- Information Explosion
- Open Access

OA

1. Query RUNE ISSN's
2. API calls for ISSN's
3. Summarise results
4. Categorise Publishers
5. Find "Gold" and "Green" items

SHERPA RoMEO

Open access

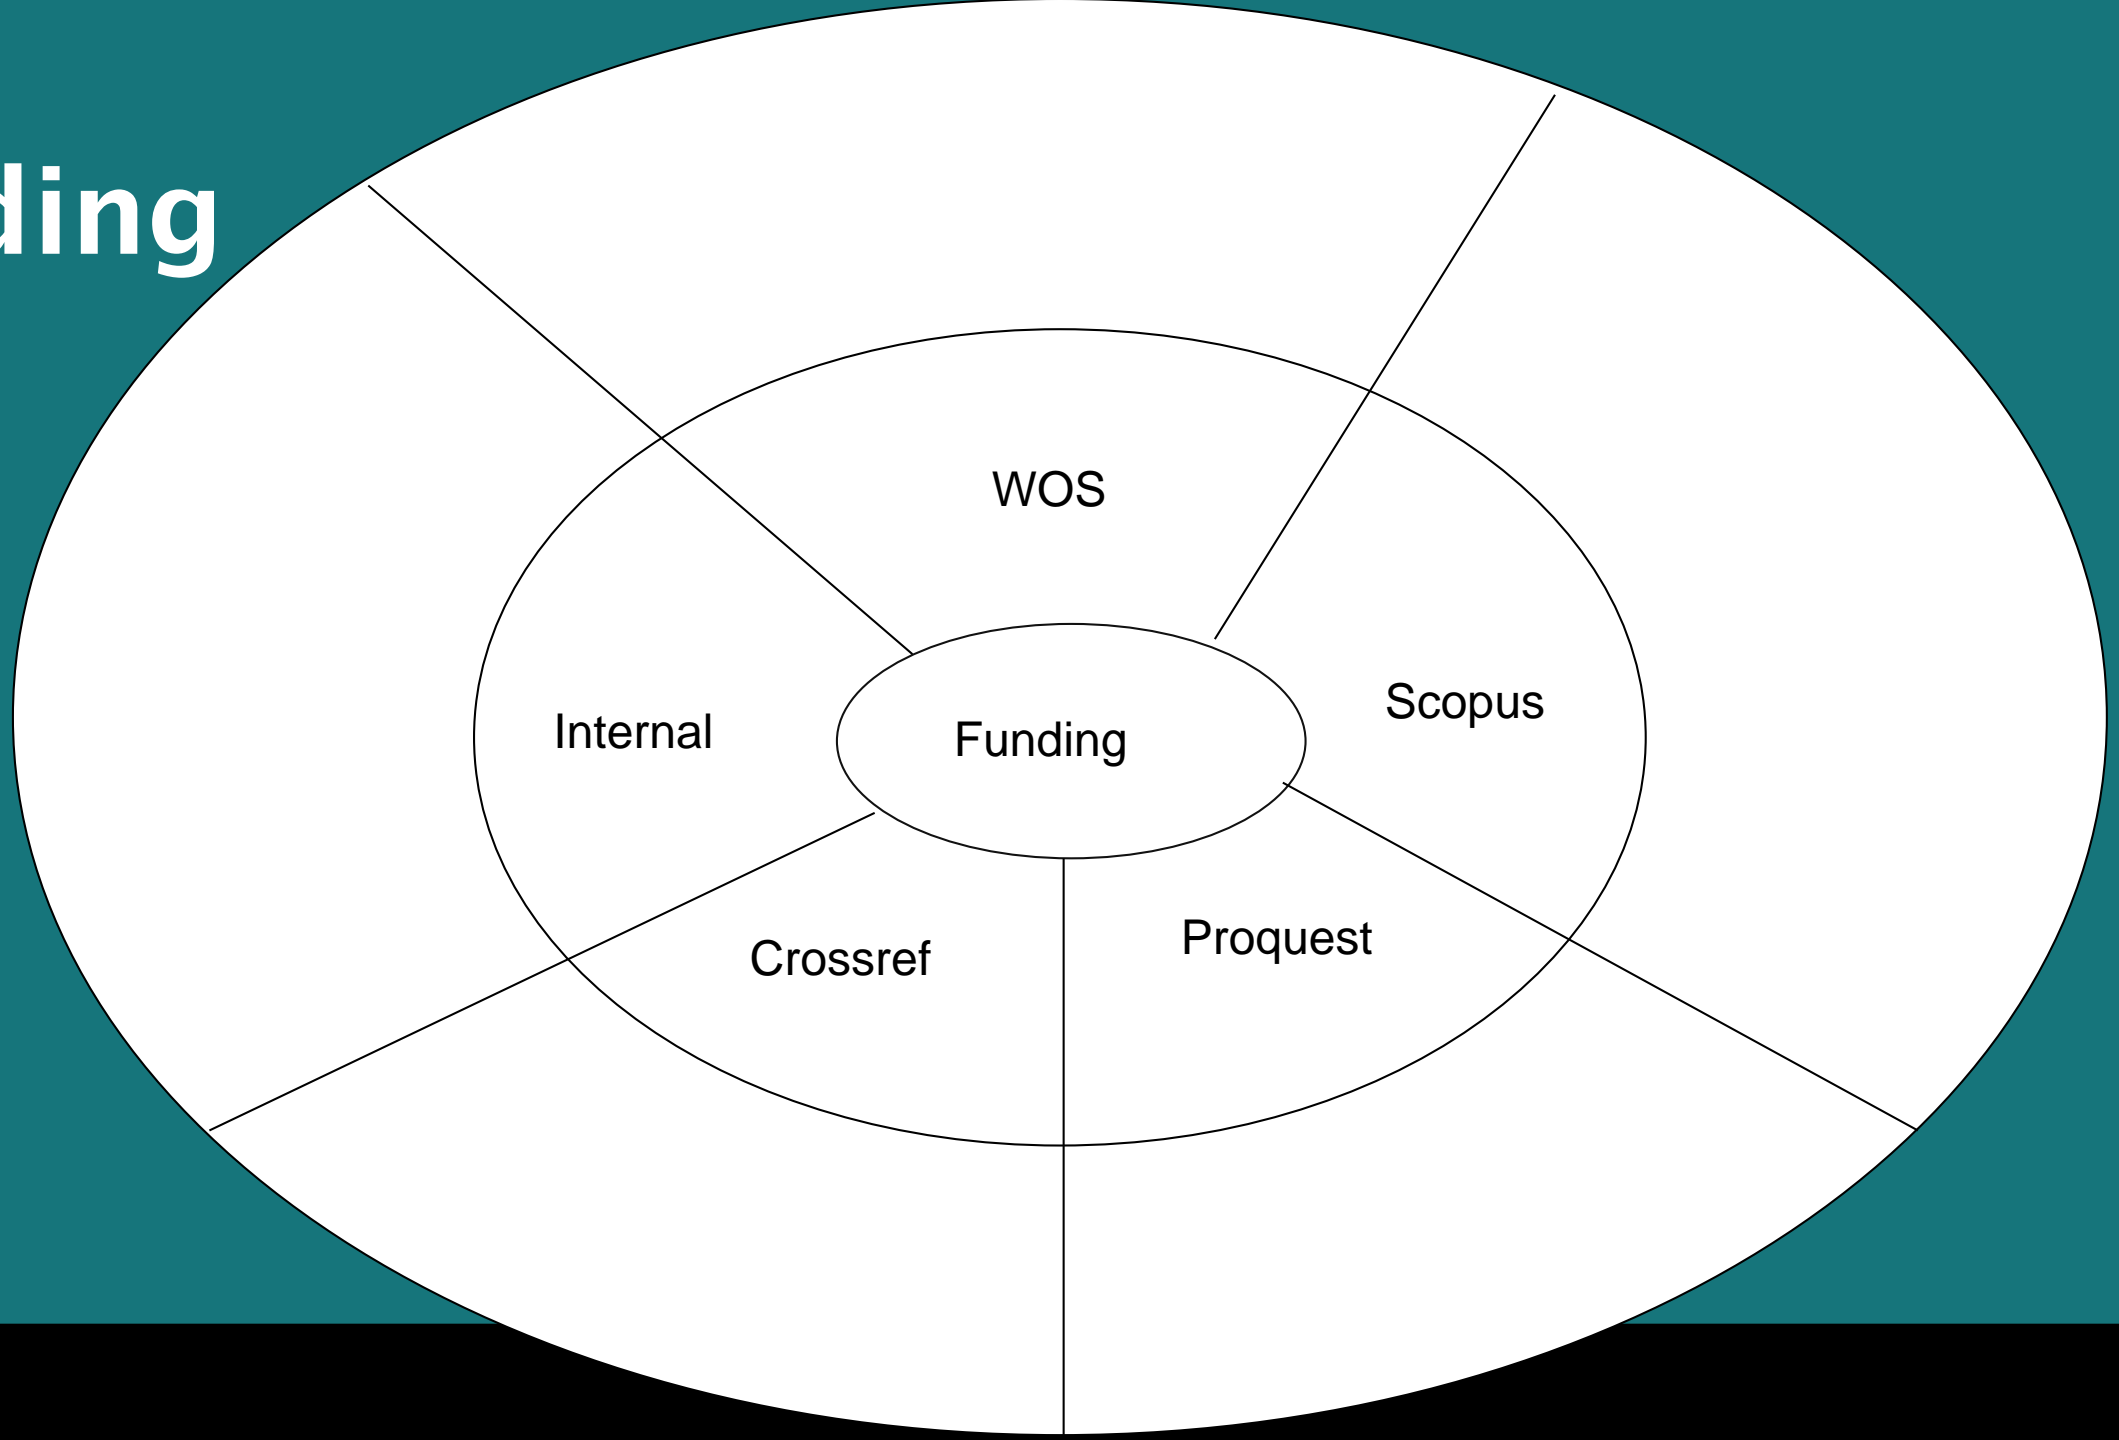

Unpaywall

- A. Bulk download
- B. Extract 100 million records
- C. Query RUNE DOI's
- D. Find "Best" open access sources

Future Directions

- Repeating gap analysis
- Capturing processes
- Additional sources
- Remaining gaps - Funding
