

## **Elsevier and Council of Australian University Librarians sign agreement to support transition to open access publishing alongside continued research access for Australia and New Zealand researchers**

*Three-year transformative agreement is the largest of its kind across the Australasian region*

**15 November, 2022**

[Elsevier](#), a global leader in research publishing and information analytics and the Council of Australian University Librarians ([CAUL](#)) – the negotiating body representing universities in Australia and New Zealand (ANZ), have today announced an agreement to provide immediate open access to ANZ research for the world and continued access to global research for ANZ readers.

The three-year agreement addresses CAUL's goals for a rapid and sustainable transition to open access publishing and represents the largest transformative agreement for both countries.

Under the agreement, which takes effect from January 2023, ANZ researchers at CAUL-affiliated academic institutions that participate in the agreement can make their research articles immediately available via open access publishing in Elsevier's journals.

Robert Gerrity, Board Director of CAUL and University Librarian at Monash University, said: "We see this agreement with Elsevier as a vital step in providing greater value to researchers in Australia and New Zealand through the inclusion of open access publishing. While this agreement provides opportunities for authors to share research more widely, we will continue to work with Elsevier to evolve this agreement to meet the needs of individual universities and their different research profiles. This agreement is an important first step in that journey."

Gemma Hersh, SVP of Global Academic & Government Sales, Elsevier, said: "We are delighted to continue building on our long-standing relationship with CAUL with an agreement that supports the priorities of the ANZ research community to transition to open access. We are grateful to CAUL for their partnership and pragmatism in reaching what is now the largest transformative agreement across Australasia and we look forward to continuing our partnership with ANZ institutions."

As one of the fastest-growing open access publishers in the world, nearly all of Elsevier's 2,800 journals enable open access publishing, including 600 fully open access journals. We now support over 2,000 institutions globally to publish open access through [transformative agreements](#). In 2021 Elsevier published 119,000 gold or pay-to-publish open access articles, an increase of more than 46% over 2020.

### **About Council of Australian University Librarians (CAUL)**

The Council of Australian University Librarians (CAUL) is the peak leadership organisation for university libraries in Australia and New Zealand. CAUL members are the University Librarians or equivalent of the 39 institutions that have representation on [Universities Australia](#) (UA) and the 8 University Librarians or equivalent of the institutions that have representation on [Universities New Zealand](#) (UNZ) and who form the [Council of New Zealand University Librarians \(CONZUL\)](#), a committee of UNZ. CAUL makes a significant contribution to higher education strategy, policy and outcomes through a commitment to a shared purpose: To transform how people experience knowledge – how it can be discovered, used and shared. CAUL's vision is that society is transformed through the power of research, teaching and learning. University libraries are essential knowledge and information infrastructures that enable student achievement and research excellence.

### **About Elsevier**

As a global leader in information and analytics, [Elsevier](#) helps researchers and healthcare professionals advance science and improve health outcomes for the benefit of society. We do this by facilitating insights and critical decision-making for customers across the global research and health ecosystems.

In everything we publish, we uphold the highest standards of quality and integrity. We bring that same rigor to our information analytics solutions for researchers, health professionals, institutions and funders.

Elsevier employs 8,100 people worldwide. We have supported the work of our research and health partners for more than 140 years. Growing from our roots in publishing, we offer knowledge and valuable analytics that help our users make breakthroughs and drive societal progress. Digital solutions such as [ScienceDirect](#), [Scopus](#), [SciVal](#), [ClinicalKey](#) and [Sherpath](#) support strategic [research management](#), [R&D performance](#), [clinical decision support](#), and [health education](#). Researchers and healthcare professionals rely on our 2,500+ digitized journals, including [The Lancet](#) and [Cell](#); our 40,000 eBook titles; and our iconic reference works, such as *Gray's Anatomy*. With the [Elsevier Foundation](#) and our external [Inclusion & Diversity Advisory Board](#), we work in partnership with diverse stakeholders to advance [inclusion and diversity](#) in science, research and healthcare in developing countries and around the world.

Elsevier is part of [RELX](#), a global provider of information-based analytics and decision tools for professional and business customers. [www.elsevier.com](http://www.elsevier.com)
