ORCID MEMBER LIFESTYLE

Member integrations are a multi-year program of work. Members need to:
- Plan
- Develop
- Integrate
- Repeat
**ORCID IN AUSTRALIA 2018**

**CONSORTIUM MEMBERS**

- **41** members
  - **2** Funders
  - **37** Higher Education

**90,000 + AUSTRALIAN RESEARCHERS REGISTERED WITH AN ORCID ID**

**INTERNATIONAL CONSORTIUM LEADER**

**32 COMPLETED INTEGRATIONS**

**VISION 2020**

**AUSTRALIA’S ORCID ASPIRATIONS**

By 2020, all Australian researchers, regardless of institutional affiliation, will be able to easily claim and manage the data regarding their research grants, research and research-related outputs through ORCID and that their details will travel with them as they build their careers.

**USER STORIES BENEFITS FOR:**
- Funders
- Publishers
- Institutions
93,358 ORCID IDs as of 1 July 2018
CONSORTIUM MEMBER INTEGRATION STATISTICS

- Total of 32 integrations done by 29 Consortium Members

Integration Activity (Jan 2018 – Aug 2018)

Types of integration - Jan 2016 – Aug 2018
Does your RPR integrate with, or display a researcher identifier scheme?
Participate: ORCID in Repositories Task Force

Posted on June 14, 2018 by Carol Minton Morris

Background and group scope
Over the past several years, new ORCID features and increased community uptake have introduced opportunities for ORCID to serve as open infrastructure for automating aspects of repository workflow.

While some repositories have developed sophisticated infrastructure that leverages ORCID to automate workflow, support for ORCID is available out of the box in only a few open source and vendor supplied systems. This means that many institutions that don’t have the resources to customize a system or develop an entirely home-grown solution are unable to make full use of ORCID in their repositories.

To improve workflow automation, author disambiguation, and visibility of repository content using the community-driven infrastructure that ORCID provides, we need better ORCID integration in more repository systems. The ORCID in Repositories Task Force will provide input on repository community needs regarding ORCID and on a set of recommendations for supporting ORCID in repository platforms that will help guide repository system developers.

Charge and Deliverables
This group is charged with reviewing and providing feedback on the proposed recommendations for supporting ORCID in repository systems, including considering:

At what points in repository workflows are ORCID IDs most useful/relevant?
What are the current challenges in using ORCID in repositories?
What ORCID features would be most helpful to include in a repository platform?
The group will develop a set of recommendations to guide repository system developers in designing and building ORCID features. These will be released for public comment before being finalized.
• All active researchers in Australia have an ORCID identifier
• All Australian researchers actively use their ORCID throughout the research lifecycle
• ORCID is seen as the best way in which to identify international research experts
• The ARC/NHMRC will integrate ORCID with their grant management systems
• Government agencies draw upon ORCID data, where possible, for institutional research performance reporting and assessment
• The Australian ORCID Consortium is a thriving, sustainable and valued organisation which has steadily grown its membership base.

Future directions

- Publisher workflows – librarians as advocates
- Integration with more vendor systems
- Future roundtables / workshops with stakeholders
- More detailed reporting about ORCID uptake by institutions
- Advocacy / communications regarding the value of ORCID in workflows
- Focus on communication with researchers
- Focus on permissions and efficiencies
